

Water Technology System Company for Contracting

WATER
TECH. SYS.
نظم تقنية المياه

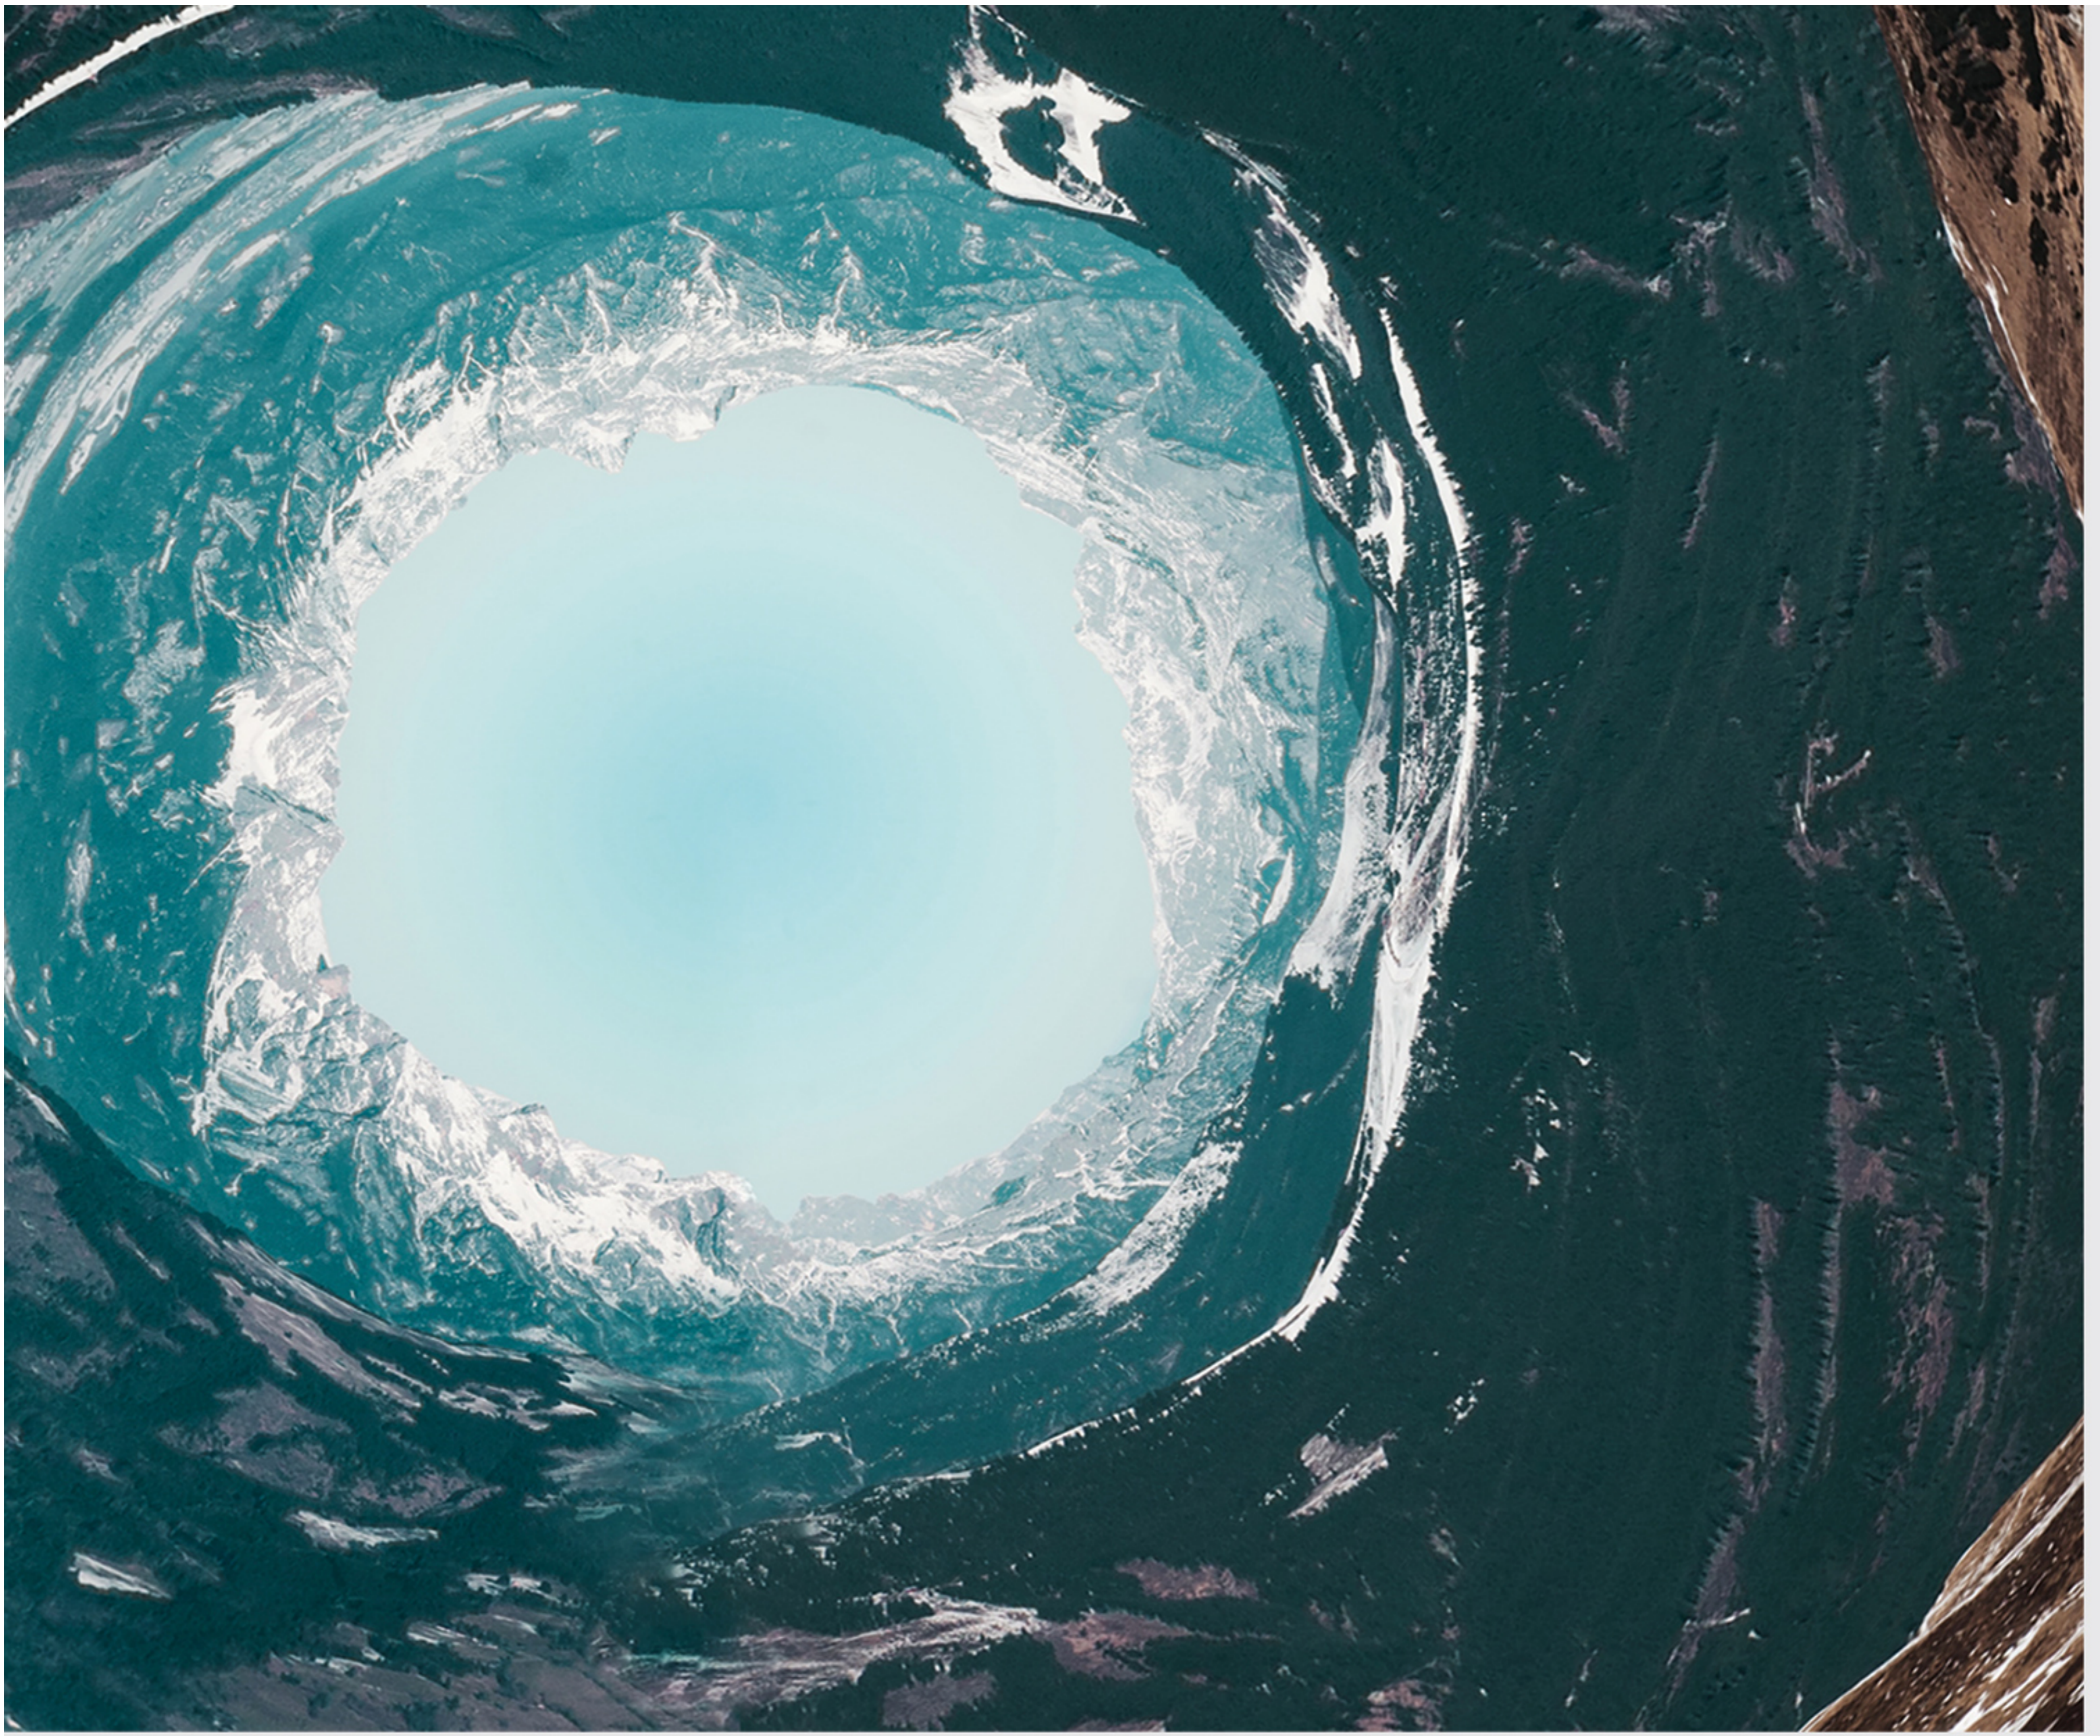

About Company

Water Technology Systems was established in 2005 by Eng. Mofag Ibraheem Bin Rashid Al Sugeir and established its head office in Riyadh. With a group of highly qualified managers, engineers and staff.

Water Technology Systems is one of the leading companies in infrastructure services (water and sewage works, network implementation, water supply, water treatment, sewage treatment, facilities management, operation and maintenance of water and sewage networks and pumping stations), development of engineering solutions for problems of networks and stations that accompany implementation.

The company carried out many government projects, notably the National Water Company in Riyadh.

The head of the water technology systems company, Eng. Mofag Ibraheem Al-Sugeir, opened the company and started the contracting work, using his previous experience of 25 years in the Water and Sewage Department in Riyadh where he worked from the engineer to the manager of the operation and maintenance of sewerage in Riyadh until he became general manager. He then moved to work in the private sector in the companies working in this field and had a track record and especially in BOT projects.

Eng. Abdulmajeed M. Abdulmajeed started work in the Water Authority in 1397H then moved to work in the private sector in Riyadh city and started with the company since its establishment. The company moved forward in growth in the past decade and has more than 30 year's experience in water network projects in Riyadh.
